This application has been withdrawn from issue under 37 CFR 1.313 (B).(3).

Claims 3-12, 15 and 19-24 are pending.

**Specification**

The disclosure is objected to because of the following informalities: Applicant's specification [0018] claims that "embodiments of computer-readable media include, but are not limited to, an electronic, optical, magnetic, or other storage or transmission .... or other transmission device or channel, both wired and wireless. Examiner recommends Applicant to delete transmission devices, both wired and wireless in Applicant's specification..

Appropriate correction is required.

**Claim Rejections - 35 USC 101**

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 19-24 are rejected under 35 U.S.C. 101 because the claims are directed to a non-statutory subject matter, specifically, the claims are not directed towards the final result that is "useful, tangible and concrete.

See State Street, 149 F.3d at 1373-74 USPQ2d at 1601-02 and Alappat, 33 F.3d at 1544, 31 USPQ2d at 1557). The decisions state to be eligible for patent protection, the claimed invention as a whole must accomplish a practical application. A claim limited to a machine or

Art Unit: 2165

manufacture, which has a practical application, is statutory. Alappat, 33 F.3d at 1544, 31 USPQ2d at 1557). That is, it must produce a “useful, concrete and tangible result”. The purpose of this requirement is to limit patent protection to inventions that possess a certain level of “real world” value as opposed to subject matter that represents nothing more than an idea or concept, or is simply a starting point for future investigation or research (Brenner v. Manson, 383 U.S. 519, 528-36, 148 USPQ 689, 693-96 (1966); In re Fisher, 421 F.3d 1365, 76 USPQ 2d 1255 (Fed. Cir. 2005); In re Ziegler, 992 F.2d 1197, 1200-03, 26 USPQ 2d 1600, 1603-06(Fed. Cir.1993).

Computer programs (such as computer program products) do not define any structural and functional relationships between the computer program and other claimed elements of a computer which permit the computer’s program functionality to be realized. Yet, a computer readable medium encoded with a computer program is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer program’s functionality to be realized, and thus is statutory.

Examiner recommends that to satisfy the 101 rejection, and to be “useful”, the claim must satisfy the utility requirement thus the invention has to be specific, substantial and credible. (MPEP 2107 and In re Fisher, 421 F.3d 1365, 76 USPQ 2d 1255 (Fed. Cir. 2005); the claims must produce a real-world result. Benson, 409 U.S. at 71-72, 175 USPQ at 676-77; and that the result that can be substantially repeatable or must substantially produce the same result again. In re Swartz, 232 F.3d 862, 864, 56 USPQ2d 1703, 1704 (Fed. Cir. 2000).

Examiner recommends Applicant to amend the claims without adding any new matter to the originally filed specification.

**Allowable Subject Matter**

Claims 3-12 and 15 are allowed over the prior art made of record as amended on December 29, 2006.

**Other Prior Art Made of Record**

The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure. U.S. patents and U.S. patent application publications will not be supplied with Office actions.
